

## Grapevine Palace Theater

ARCHITEXAS provided full architectural services through construction including acoustical design, theatrical lighting design and kitchen design. The project involved restoration, additions and adaptive use of the historic 1940 movie theater and the 1923 grocery building. The rehabilitated movie theater serves as a multi-purpose space for live theater, music recitals and a public events hall which includes a kitchen and retail space. The additions increased the backstage area and changing areas for live performances.
