

Denton County Courthouse Restoration

The Denton County Courthouse was designed by architect W.C. Dodson and is considered to be one of the most significant and impressive examples of public architecture in Texas. A master plan was prepared that identified three phases of work based on the level of critical need for preservation. One of the most critical items of work was the masonry, which had suffered from previous repair campaigns. The masonry was conserved, the exterior restored and the interior was rehabilitated to reveal the historic design, while upgrading the building for code compliance and state of the art mechanical, electrical and data systems.

Location

Denton, Texas

Project Duration

2001 - 2004

Cost of Construction

\$3.7 million

Square Footage

31,000 square feet

Scope of Services

Historic Structures Report and Master Plan
THCPP Participant
Architectural
Masonry Conservation
Phased Construction

Awards and Publications

Historic Restoration Award, Preservation Texas
