

## Fair Park Paint Analysis and Restoration Maintenance Plan

ARCHITEXAS provided paint analysis services and interpretation of the 1936 paint color scheme for the entire 277 acre site and a restoration maintenance plan to ensure the restoration work completed recently and planned for the future will be maintained. There are over 10 reports completed to date which have uncovered substantial decorative painting on buildings interiors and exteriors. The restoration maintenance plan provides a schedule and guidelines for maintaining historic materials, the 1936 paint colors, mechanical and electrical systems, landscape and historic lighting, on a computer based, CAD drawing friendly facilities management program.
