

Shepherd of Life Lutheran Church

ARCHITEXAS provided a long range master plan for expansion of an existing “First Unit” facility for a congregation in Arlington. To produce the master plan, ARCHITEXAS conducted a programming and design workshop to establish the church’s long range goals, needs, facts and concepts, to develop a multi-phased plan for future expansion. The master plan was designed to accommodate a new sanctuary to seat 350. The original worship area was converted to a fellowship hall. Additional classrooms and expanded parking were also included. ARCHITEXAS provided full architectural services through construction to complete the new campus.

Location

Arlington, Texas

Project Duration

2000 - 2001

Cost of Construction

\$1.3 million

Square Footage

13,000 square feet
